

On a Mission to create
**A great place to work
and to be from.**

Lead Frontend Engineer (Angular)

Location: Delhi

Experience: 6+ Years (including 2+ Years in a Leadership or Architect Role)

Employment Type: Full-time

About the Role

We are on the lookout for a Lead Frontend Engineer specializing in Angular — a hands-on leader with a passion for building scalable, performant, and intuitive web applications. This role goes beyond coding; you will play a key part in architecting the frontend foundation, mentoring engineers, and driving the overall technical direction for our web platforms. If you thrive in a collaborative environment, love solving complex challenges, and are eager to shape the future of our digital products — this opportunity is for you.

Key Responsibilities

- Lead and manage a team of Frontend Engineers, providing technical mentorship, career guidance, and performance feedback.
- Architect and design modern, scalable, and maintainable frontend applications using Angular and contemporary web technologies.
- Collaborate closely with Product Managers, UX/UI Designers, Backend Engineers, and QA teams to deliver seamless, high-quality user experiences.
- Define, implement, and enforce coding standards, architectural best practices, and development workflows for the team.
- Conduct regular code reviews, design discussions, and technical deep dives to uphold engineering excellence.
- Identify performance bottlenecks, technical risks, and architectural challenges — and proactively drive resolutions.
- Stay abreast of emerging technologies, frameworks, and trends in frontend development; continuously evaluate and incorporate them where beneficial.
- Contribute to technical strategy, roadmap planning, and project estimations.

Required Skills & Experience

- 6+ years of professional frontend development experience, with a strong focus on Angular (Angular 9+ preferred).
- 2+ years of experience in a lead, architect, or senior technical role, managing and mentoring frontend teams.
- Proficiency in TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, and RxJS.
- Deep understanding of frontend architectural patterns, performance optimization techniques, and state management libraries.
- Experience integrating with RESTful APIs, WebSocket services, and third-party libraries.
- Strong appreciation for UI/UX principles and the ability to translate designs into pixel-perfect, responsive interfaces.
- Excellent communication, leadership, and stakeholder management skills.
- Familiarity with CI/CD processes, automated testing frameworks, and code quality tools.

Bonus Points

- Experience with micro frontend architecture or multi-tenant application frameworks.
- Exposure to other frontend ecosystems like React or Vue.js.
- Knowledge of cloud services (AWS, Azure) and DevOps pipelines for frontend deployments.
